```
The user will input gross pay, saving percentage rate, and IRA percentage investment rate. Based on the information the program will give a summary of the amount that is applied to: Savings, IRA, and Total Money Applied to Both Accounts.

Input gross pay: 60000
Input percent saved (ex. 12% = 12): 5
Input percent invested in IRA (ex. 8% = 8): 12

Gross pay entered: $60000.0
Percentage applied to savings: 5.0%
Percentage invested in an IRA: 12.0%
Amount of money transfered to savings: $3000.0
Amount of money invested into an IRA: $7200.0
Total amount of money in savings and IRA is: $10200.0
